

Watch Decomposition in Action

Watch decomposition happen right before your very eyes! This activity was taken from http://www.gfawesome.org/~flashVersion=true/mad_science/activities/Watch_decomposition.html

Take a new zip-lock plastic bag and add a leaf and some water from a pond.

Fill the bag 2/3's up with water and zip the bag closed.

Take some duct tape and tape the bag with the water and the leaf to a wall inside your home away from any direct sunlight.

Watch the leaf for the next 30 days and you will see it decompose.

Take a picture of the leaf before you put it in the water.

Then take a picture of the leaf after it has been in water for 30 days - it will be a skeleton.
